## About the program

This course will assist many healthcare workers to identify the medical terms used during their duty hours, this knowledge help to fill the gap of communication between the health care providers and other non-clinical background workers at the health facility.

**Target Audience:** All Healthcare Practitioners

## Learning Objectives

- Describe the component parts of medical terms.
- Analyze the component parts of medical terms.
- Use basic prefixes, suffixes, and combining forms to build medical terms.
- Explain the common rules for proper medical term formation, pronunciation, and spelling.
- Relate the terminology to the names, locations, and functions of the major organs of the body systems
- Describe the terms utilized for the major disease processes including symptoms, diagnosis, diagnostic testing, surgeries, and therapies.
- Use common terms and abbreviations in documenting medical records related to the major systems of the body
- Identify medical terminology and health issues

## Learning Outcome

**Upon completion of the course, participants will be able to match the standardized language of communication of medical professions and non-medical at the health facilities by:**

- Analyze medical terms and its component (roots and prefix and suffix).
- Recognize the meaning of the common medical terms used at health facilities.
- Identify the body organs, positions, cavities and be able to use this knowledge in practice.
- Practice building words using the word elements associated with main body systems.
- Describe common laboratory tests, diagnostic and surgical procedures associated with main body systems.
- Apply what they learned by interpreting Medical Terms in practice.
